Crestfield Rehabilitation Center and Fenwood Manor	Manchester	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)					Common areas (e. g. hallways, dining room)		Won't all for multiple answers, some patient rooms, all common areas and employee areas	Too expensive	Electrical system not capable			
Cromwell Healthcare & Rehabilitation Center	Cromwell	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)			Different in different parts of the building. Central in most corridors. Ind. in some rooms.			Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Also, individual units in some rooms as required.				No need	Current partial system meets needs
CT Baptist Homes, Inc.	Meriden	Yes	Central air conditioning					common areas only			Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)		Too expensive				
CT Health of Southport	Southport	Yes	Central air conditioning						All (central air)					Too expensive				Replacement units
Danbury HCC	Danbury	Yes		Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)		Kitchen area is centralized A/C		Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Some is centralized; key areas have large in the wall units				No need	Building is kept very cool with additional units to supplement central A/C.
Douglas Manor	Windham	Yes	Central air conditioning						All (central air)								No need	
East Hartford Rehab	E. Hartford	Yes		Single window units (residential rooms)						Patient rooms		Employee areas (e. g. break room, laundry)		too expensive				Kitchen is not air conditioned
Edgehill	Stamford	Yes	Central air conditioning					each resident room has unit that provides heat and air conditioning based on the resident's preference		Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)					No need	Spare parts available to manage immed. repair of heating/cooling units (prev. described)
Elim Park Baptist Home, Inc	Cheshire	Yes	Central air conditioning	Single window units (residential rooms)					All (central air)								No need	Central air except 11 rooms with window units
Ellis Manor	Hartford	Yes	Central air conditioning						All (central air)					Too expensive				
Essex Meadows	Essex	Yes	Central air conditioning						All (central air)								No need	
Evergreen Health Care Center	Stafford Springs	Yes	Central air conditioning			Single window units (employee work areas)			All (central air)								No need	
Evergreen Woods	North Branford	Yes	Central air conditioning						All (central air)								No need	We also have air conditioning units and fans if necessary

Fairview/ Oddfellows Home of CT	Groton	Yes	Central air conditioning						All (central air)	Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)					No need	n/a
Farmington Care Center	Farmington	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)					Common areas (e. g. hallways, dining room)		Resident rooms have window units	Too expensive	Electrical system not capable	Facility design prevents use		
Filosa for Nursing and Rehabilitation	Danbury	Yes	Central air conditioning						All (central air)								No need	N/A our building is 100% air conditioned
Fountainview Care Center	Waterford	Yes	Central air conditioning								Common areas (e. g. hallways, dining room)			Too expensive				
Fox Hill Center	Rockville	Yes	Central air conditioning	Single window units (residential rooms)					All (central air)					Too expensive				entire facility is A/C equipped
Gardner Height	Shelton	Yes		Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)				Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)			Electrical system not capable			
Geer Nursing and Rehabilitation Center	Canaan	Yes	Central air conditioning	Single window units (residential rooms)						Patient rooms			Common areas, employee areas				No need	
Gladeview Health Care Center	Old Saybrook	Yes	Central air conditioning	Single window units (residential rooms)					All (central air)								No need	
Glastonbury Health Care Center	Glastonbury	Yes	Central air conditioning						All (central air)				Building built in 2 phases... original structure (1989) has AC in common areas only. Newer portion (1996) has AC in rooms as well.	Too expensive	Electrical system not capable			
Glen Hill Care & Rehabilitation	Danbury	Yes		Single window units (residential rooms)		Single window units (employee work areas)				Patient rooms			employee areas	Too expensive				
Glendale Center	Naugatuck	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)					Common areas (e. g. hallways, dining room)		Pt rooms, common, employee areas but not considered central	Too expensive				very difficult to replace broken window units due to \$ and takes time/don't have stock of this
Golden Hill Health Care Center	Milford	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)				Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)					No need	Central air in common areas, full building retrofit is cost prohibitive
Governor's House Care and Rehabilitation Center	Simsbury	Yes	Central air conditioning								Common areas (e. g. hallways, dining room)							Facility design prevents use
Greentree Manor Nursing & Rehabilitation Center	Waterford	Yes	Central air conditioning						All (central air)								No need	We have central air conditioning
Greenwich Woods HCC	Greenwich	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)						Common areas (e. g. hallways, dining room)		Common areas have central air conditioning and resident rooms have window units				No need	
Groton Regency Center	Groton	Yes	Central air conditioning	Single window units (residential rooms)					All (central air)			Employee areas (e. g. break room, laundry, kitchen)					No need	N/A
Grove Manor	Waterbury	Yes	Central air conditioning								Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)		Too expensive				
Hamden Health Care Center	Hamden	Yes	Central air conditioning						All (central air)								No need	
Hancock Hall	Danbury	Yes	Central air conditioning														No need	
Harrington Court	Colchester	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)		central air is in the hallways and common areas including the dining room			Common areas (e. g. hallways, dining room)		Several Patient rooms have window units as well as employee areas	Too expensive	Electrical system not capable			Electrical would need an upgrade
Hebrew Healthcare	West Hartford	Yes	Central air conditioning					Chilled water	All (central air)					Too expensive		Facility design prevents use		
Hewitt Health & Rehab	Shelton	Yes	Central air conditioning	Single window units (residential rooms)					All (central air)				some areas of building it is not functioning.	Too expensive				
Hiltop Health Center	Ansonia	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)			All (central air)	Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)					No need	

Holy Spirit Health Care Center	Putnam	Yes		Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)		Ductless air conditioning in common areas		Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Rehab Room, Activities Room			No need	
Honey Hill Rehabilitation and Nursing Center	Norwalk	Yes	Central air conditioning						All (central air)	Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)				No need	
Hughes Health and Rehabilitation, Inc.	West Hartford	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)				Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)				No need	N/A
Ingraham Manor	Bristol	Yes	Central air conditioning					Common areas are air conditioned by central air, not resident bedrooms.			Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	The kitchen is not air conditioned.	Too expensive			Have begun to install a/c in 20 rooms Phase 1 of a 3 phase process to provide a/c in all patient rooms by 2012.
Jefferson House	Newington	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)				All (central air)							No need	
Jerome Home	New Britain	Yes	Central air conditioning	Single window units (residential rooms)							Common areas (e. g. hallways, dining room)		Some resident rooms with single window units	Too expensive	Electrical system not capable		
Jewish Home for the Aged	New Haven	Yes	Central air conditioning						All (central air)							No need	Fully air conditioned
Kettle Brook Care Center	East Windsor	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)			All (central air)				Free standing units in patient rooms, central air in hallways, common areas	Too expensive	Electrical system not capable	Facility design prevents use	
Kimberly Hall North	Windsor	Yes	Central air conditioning					Central air in common areas and individual PTAC units in resident rms		Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Some hallways and laundry is not			No need	Facility has central air and individual units in resident rooms
Kimberly Hall South	Windsor	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)					Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Individual a/c's in many resident rooms but not all			No need	
Laurel Hill Healthcare	Winsted	Yes	Central air conditioning			Single window units (employee work areas)			All (central air)							No need	
Laurel Ridge Health Care Center	Ridgefield	Yes	Central air conditioning						All (central air)							No need	
Ledgecrest Health Care Center	Kensington	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)			All (central air)	Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)				No need	We have central air plus window units
Leeway	New Haven	Yes	Central air conditioning						All (central air)							No need	We have AC throughout the building
Litchfield Woods Health Care Center	Torrington	Yes	Central air conditioning	Single window units (residential rooms)				Central air in common areas, dining room and hallways. Some residents have individual AC window units. WG unit has AC in the rooms (central air)			Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Laundry does not have AC.			No need	Partial air. Sliding windows make it challenging to put in window units, however, able to be done upon request.
Long Ridge of Stamford	Stamford	Yes	Central air conditioning		single window units (common areas)				All (central air)					Too expensive	Electrical system not capable		Some patients have isolated window units as by request
Lord Chamberlain Nursing Facility	Stratford	Yes	Central air conditioning						All (central air)					Too expensive			Service Wing not air conditioned due to layout
Lourdes Health Care Center	Wilton	Yes	Central air conditioning						All (central air)							No need	have central air
Ludlowe Center for Health & Rehabilitation	Fairfield	Yes	Central air conditioning						All (central air)								
Lutheran Home of Southbury	Southbury	Yes	Central air conditioning	Single window units (residential rooms)				PTAC Units in various resident rooms and common areas	All		Common areas (e. g. hallways, dining room)		Central air for all resident areas. Most resident rooms have their own window AC (61 rooms)		Facility design prevents use	No need	We have one wing where facility design precludes central air. That area has window units and an air circulator
Madison House Care & Rehabilitation Center	Madison	Yes	Central air conditioning								Common areas (e. g. hallways, dining room)					No need	
Maefair Health Care	Trumbull	Yes	Central air conditioning						All (central air)	Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)				No need	
Manchester Manor Health Care Center	Manchester	Yes	Central air conditioning					split units - resident rooms			Common areas (e. g. hallways, dining room)		employee break room, some patient rooms, offices, resident lounges	Too expensive	Electrical system not capable

River Glen HCC	Southbury	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)		Thru wall resident and common areas, central air throughout bldg		All (central air)					No need	We have air conditioning throughout building	
Riverside Health & Rehabilitation Center	East Hartford	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)				All (central air)		except laundry			No need		
Rocky Hill Skilled Nursing and Rehabilitation	Rocky Hill	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)		central air conditioning in hallways			Common areas (e. g. hallways, dining room)	some patient rooms, some employee areas, hallways and common areas	Too expensive	Electrical system not capable	Facility design prevents use	prior to this summer our generator would not be able to handle the load, but we now have 100% capacity on generator so not an issue, not sure cost/electrical issues to put in A/C in all resident rooms ( residents during hot weather earlier this month were cool without it). Kitchen/Laundry on lower level might be difficult to install	
Rose Haven	itchfield	Yes		Single window units (residential rooms)	Single window units (common areas)						Common areas (e. g. hallways, dining room)			Electrical system not capable	Facility design prevents use	we have window units	
Rosegarden Health and Rehabilitation Center	Waterbury	yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)				Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)		Too expensive				
Saint Joseph Living Center	Windham	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)			No central A/C in resident rooms, only hallways			Employee areas (e. g. break room, laundry, kitchen)				Facility design prevents use	uncertain, have not assessed in room cost	
Saint Mary Home	West Hartford	Yes	Central air conditioning	Single window units (residential rooms)				The hallways and common areas have central air. There are a limited number of rooms with window units.			Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Only our sub acute units have built in air conditioning in resident rooms. Other units have A/C window units, but not in every room.		Electrical system not capable	The design of the physical plant is not really conducive to install central air without a very expensive capital expenditure.	
Salmon Brook Center	Glastonbury	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)				All (central air)		some resident rooms with window a/c				No need	
Seabury	Bloomfield	Yes	Central air conditioning							All (central air)						No need

Sharon Health Care Center	Sharon	Yes	Central air conditioning	Single window units (residential rooms)				Single units available for residents with breathing issues			Common areas (e. g. hallways, dining room)	Also break room kitchen and partial laundry		Electrical system not capable		Rooms are on shared circuits installing air conditioners in rooms with shared circuits can trip circuit breakers	
Shelton Lakes	Shelton	Yes	Central air conditioning	Single window units (residential rooms)						All (central air)						No need	
Sheriden Woods HCC	Bristol	Yes	Central air conditioning			Single window units (employee work areas)					Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Too expensive				

Silver Springs Care Center	Meriden	Yes	Central air conditioning	Single window units (residential rooms)	Single window units (common areas)	Single window units (employee work areas)		The "Central AC" are rooftop compressors which feed units in the main hallways on all resident units. Resident rooms have some through the wall, and some window AC units.		Patient rooms	Common areas (e. g. hallways, dining room)	Employee areas (e. g. break room, laundry, kitchen)	Some service areas, e.g. laundry and kitchen do not have AC units. All resident areas are covered.	Too expensive	Electrical system not capable		Some larger resident rooms would benefit from more than one window unit, or larger through the wall units, but the building is old and electrical system would require an expensive upgrade to make additional AC feasible.	
Skyview Center	Wallingford	Yes	Central air conditioning	Single window units (residential rooms)		Single window units (employee work areas)				Selected patient rooms	Common areas (e. g. hallways, dining room)			Too expensive				
Smith House SNF	Stamford	Yes	Central air conditioning						All (central air)								No need
